They could be using **these!**

WE HAVE A LOAD DISC FOR EVERY PROCESS.

Load Discs by KM:

- Highest reliability
- Lowest maintainance
- Cleanable
- Simple
- Elegant

If your application is:
 MODERATE RISK
 HIGH-VALUE

You need:
 LOAD DISC 3xi

Because:
Lower capacities, higher accuracies, costs less and comes with optional Turck™ watertight cabling system.

If your application is:
 HIGH-CAPACITY
 WEIGHING

You need:
 LOAD DISC II

Because:
Monolithic lock-down, smooth watertight 17-4 stainless steel construction to 100,000-lb. (45.3kg).

If your application is:
 HIGH-RISK, HIGH-COST

You need:
 LOAD DISC 360s

Because:
Most rugged monolithic design, eliminates difficult installation procedures (like orientation and leveling), standard Turck™ watertight cabling system, easy-to-clean, smooth 17-4 stainless steel finish.

Call us today. 800.426.9010 We can show you why KM Load Discs make it all better!
